

Air Hose

Lightweight, Flexible, Duration, PU (Polyurethane) Air Hose

NEW FLEX Air Hose

[Model Number : E-NF-(I.D.)]

Applications • Fluids

(Materials / Structure)

- For Air Tool at Automobile Body Shop
- For Air Hose for Air Inflator and Air Compressor
- For Air Hose for Building Painting, Air Duster, and Woodworking

*2: "Diameter (D)" × "Height (H)" means "External Dimensions of Cardboard Box (D)" × "Height (H)."

Characteristics and Functions

- Cold Resistance
- Lightweight
- Portable Tool
- Pressure-Proof
- Flexibility

- **Duration**...Polyurethane resin is strong in abrasion resistance. Thus, E-NF is suitable for air tools such as air driver.
- **Cold Resistance**...Polyurethane resin is great at cold resistance. Thus, even though temperature reaches around minus 20 degrees Celsius, E-NF does not get harden, keeping the work efficiency.
- **Lightweight**...Compared with rubber and PVC hoses, E-NF is a light hose, reducing the burdens of your wrestles and arms.
- **Easy to Cut**...Since we print the cut mark on the hose every one meter, it is easy to cut and check how many meters you have used.
- **Original Fittings**...By using our original fittings, you can avoid accidents which are caused by incorrect choices of hose and fittings. (φ 6.5 · φ 8.5)

HAKKO Original Fittings

(Joints For Air Hose (Push-to-Connect Joint))

- Socket and Plug are connectable without effort.
- The spring part prevents the twisting of the hose due to the rotary function.
- Lock function of the socket prevents the hose from hooking off the plug.
