## **For Low Pressure** Mini Cupla Standard type for use on equipment for welding and gas cutting, etc.

### **Exclusively for oxyacetylene equipment.** Many variations with higher flow rates!

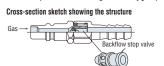

- From cylinders to torches, all piping connections associated with welding and cutting equipment are push-to-connect operations.
- Double-lip seal prevents minor leak during connection. Oxygen and fuel gas Cuplas have different sizes to prevent accidental interconnection.
- Pressure loss is minimized to achieve higher flow rate.
- Various types of end configurations have been standardized to comply with a wide range of welding and cutting equipment applications. Sockets themselves or plugs themselves are interchangeable with Mini Cupla Super's counterparts.

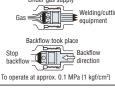

### Structure and Principle of Backflow Prevention

### Plug with backflow stop valve

Plugs with backflow stop valve in Mini Cupla are designed exclusively for gas welding/cutting to prevent occurrence of gas mixing. Possible backflow of gas during operation can be stopped by cutting the back flow into the cylinder or line. Such valve is adopted in both fuel gas and oxygen plug.

Specifications								
Body material			Brass					
Size	Thread		1/8", 1/4", 3/8" / M16, W12.5-20					
	Hose barb		1/4", 5/16", 3/8"					
MPa     kgf/cm²   bar   PSI		0.7						
		kgf/cm <sup>2</sup>	7					
		bar	7					
		PSI	102					
Seal material			Seal material	Mark	Working temperature range	Remarks		
Working temperature range		Nitrile rubber	NBR (SG)	-20°C to +80°C	Standard material			

Max. Tightening Torque Nm {kgf•cm}					
Model	22PF, 22PFB, 22SF, 25PF, 33PF, 33PFB, 33SF	22SM	33SM		
Torque	12 {122}	9 {92}	11 {112}		

# Flow Direction Fluid must run from socket to plug.

To prevent accidental interconnection, no Cuplas for oxygen can be connected with those for fuel gas Cuplas. However, oxygen plugs and sockets are interchangeable regardless of end configurations and fuel gas plugs and sockets are interchangeable regardless of end configurations.

Also Mini Cupla models for oxygen are interchangeable with Mini Cupla Super models for oxygen, while fuel gas models are interchangeable.

Min. Cross-Sectional Area (m				
Model	22SP, 25SP	33SP, 35SP		
Min. cross-sectional area	20	44		

#### **Suitability for Vacuum**

Not suitable for vacuum application in either connected or disconnected condition.

### **Pressure - Flow Characteristics**

[Test conditions] •Fluid : Air •Temperature : Room temperature
